Contents–Volume 83
January through December 2012

JANUARY 2012

EDITORIAL

1 **A Year of Change**
F. Bonato

RESEARCH ARTICLES

2 **Space Adaptation Back Pain: A Retrospective Study**
E. L. Kerstman, R. A. Scheuring, M. G. Barnes, T. B. DeKorse, and L. G. Saile

8 **Gender Differences in Pharmacokinetics of Antipyrine in a Simulated Weightlessness Rat Model**
B. Wei, C. V. Abobo, J. Ma, and D. Liang

14 **Ocular Vestibular Evoked Myogenic Potentials and Motion Sickness Susceptibility**
S-J. Xie, W. Chen, H-B. Jia, Z-J. Wang, Q. Yao, and Y-Y. Jiang

19 **Assessing the Severity of Color Vision Loss with Implications for Aviation and Other Occupational Environments**
M. Rodriguez-Carmon, M. O'Neill-Biba, and J. L. Barbur

30 **Pre-Dive Exercise and Post-Dive Evolution of Venous Gas Emboli**
M. Gennser, K. M. Jurd, and S. L. Blogg

35 **Change in Anthropometrics and Aerobic Fitness in Air Force Cadets During 3 Years of Academy Studies**
A. Aandstad, R. Hageberg, Ø. Sæther, and R. O. Nilsen

42 **The Annual Incapacitation Rate of Commercial Pilots**
S. Evans and S-A. Radcliffe

SHORT COMMUNICATIONS

50 **Erythropoietin, 2,3 DPG, Oxygen Transport Capacity, and Altitude Training in Adolescent Alpine Skiers**
H. J. Son, H. J. Kim, J. H. Kim, H. Ohno, and C. K. Kim

54 **Measuring Manual Dexterity and Anxiety in Divers Using a Novel Task at 35–41 m**
W. Kneller, P. Higham, and M. Hobbs

58 **Heat Tolerance in Women—Reconsidering the Criteria**
D. Amit, C. Makranz, D. Moran, R. Yanovich, Y. Epstein, and H. Yuval

61 **A Case of Active Tuberculosis in a Cabin Crew: The Results of Contact Tracing**
C. Thibeault, F. Tanguay, C. Lacroix, R. Menzies, and P. Rivest

COMMENTARY

64 **Space Obstructive Syndrome: Intracranial Hypertension, Intraocular Pressure, and Papilledema in Space**
T. C. Wiener

LETTER TO THE EDITOR

67 **Back Pain and Airline Pilots**

FEATURES

68 **NASA Human Research Program Summaries: Enhancing Bone Recovery After Spaceflight**—*M. A. Frey*

70 **Science & Technology Watch: Breathalyzer for Fatigue: the "Fatigualizer"**—*V. E. Martindale*

72 **You're the Flight Surgeon**—*J. J. Cotton and K. S. Johnson*

74 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

FEBRUARY 2012

RESEARCH ARTICLES

79 **Estimating Outcomes of Astronauts with Myocardial Infarction in Exploration Class Space Missions**
D. B. Gillis and D. R. Hamilton

92 **Computational Simulation of Hematocrit Effects on Arterial Gas Embolism Dynamics**
K. Mukundakrishnan, P. S. Ayyaswamy, and D. M. Eckmann

102 **Squat Exercise Biomechanics During Short-Radius Centrifugation**
K. R. Duda, T. Jarchow, and L. R. Young

111 **Net Energy Expenditure of Gravity-Independent High-Speed Resistive Exercise Done by Women**
J. F. Caruso, J. A. Borgsmiller, R. D. Riner, M. L. Mason, B. R. Lutz, and C. C. Nelson

118 **Peripheral Vascular Responses of Men and Women to LBNP**
T. Hachiya, I. Hashimoto, M. Saito, and A. P. Blaber

125 **Sleep-Wake Differences in Heart Rate Variability During a 105-Day Simulated Mission to Mars**
D. E. Vigo, B. Orgrinz, L. Wan, E. Bersenev, F. Tuerlinckx, O. Van den Bergh, and A. E. Aubert

131 **Propranolol's Potential to Increase Survival Time in a Disabled Submarine**
S. A. Reini, D. M. Fothergill, H. G. Gasier, and W. G. Horn

SHORT COMMUNICATIONS

136 **+G_z Centrifugation and Mood**
M. P. Biernacki, K. S. Jankowski, K. Kowalczuk, R. Lewkowicz, and M. Dereń

140 **Aeromedical Decision Making and Seizure Risk After Traumatic Brain Injury: Longitudinal Outcome**
S. A. McGuire, R. W. Marsh, T. W. Sowin, and A. Y. Robinson

CASE REPORT

144 **Positional and Rotational Stability of the Toric Phakic Intraocular Lens Under High +G_z Environments**
M. C. L. Tan and G. K. M. Nah

LETTER TO THE EDITOR

148 **Occupational Cosmic Radiation Exposure of Flight Attendants May Cause Cancer**

FEATURES

149 **Book Review**

150 **NASA Human Research Program Summaries: Skeletal Effects of Exposure to Heavy-Ion Radiation Under Conditions of Musculoskeletal Disuse**—*M. A. Frey*

152 **Science & Technology Watch: Cloud Computing in Biomedical Research**—*D. M. Kupfer*

154 **You're the Flight Surgeon**—*C. S. Walker*

155 **Erratum**

156 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

MARCH 2012
AsMA 83rd Annual Scientific Meeting Program and Abstract Issue
Hilton Atlanta, Atlanta, GA
May 13-17, 2012

165 **President's Page**
166 **Educational Objectives/Credit Hours**
167 **Workshops**
167 **Historic Feature Film**
168 **FAA Schedule**
169 **Program Schedule**
209 **Meeting Abstracts**
355 **Index to Abstract Authors**
359 **Index to Session Chairs**
360 **58th Louis H. Bauer Lecturer: Martin Cetron, M.D.**
360 **47th Harry G. Armstrong Lecturer: David O. Freedman, M.D.**
361 **Exhibits**

AsMA Business
364 **Past Presidents of AsMA**
365 **Council of AsMA**
366 **Annual Meeting Chairs & Committees**
367 **Headquarters Staff Photos**
367 **Wing Board of Directors**
368 **Minutes of the 2011 Business Meeting**
370 **Bylaws of the Aerospace Medical Association**
378 **Proposed Changes to Bylaws (for approval at Business Meeting)**
381 **Maps of Meeting Spaces**
CIII **Program at a Glance**

APRIL 2012

RESEARCH ARTICLES

383 **Space Shuttle Flight Crew Spatial Orientation Survey Results**
R. L. Small, C. M. Oman, and T. D. Jones

388 **Subfoveal Choroidal Thickness and Foveal Retinal Thickness During Head-Down Tilt**
A. Shinojima, K. Iwasaki, K. Aoki, Y. Ogawa, R. Yanagida, and M. Yuzawa

394 **Temporal Artery Doppler Spectrum Morphology Responses to Tilt and LBNP as an Early Indicator of Syncope**
P. Arbeille, K. Zuj, K. Shoemaker, and R. Hughson

403 **Orthostatic Hypotension After 10 Days of Exercise-Heat Acclimation and 28 Hours of Sleep Loss**
P. Y. S. Poh, L. E. Armstrong, D. J. Casa, L. S. Pescatello, B. P. McDermott, H. Emmanuel, and C. M. Maresh

412 **Victim Fragmentation Patterns and Seat Location Supplements Crash Data: American Airlines Flight 587**
G. M. Vidoli and A. Z. Mundorff

418 **Transient Immune Impairment After a Simulated Long-Haul Flight**
A. Wilder-Smith, F. B. Mustafa, C. M. Peng, A. Earnest, D. Koh, G. Lin, I. Hossain, and P. A. MacAry

REVIEW ARTICLE

424 **Respiratory-Related Limitations in Physically Demanding Occupations**
P. I. Brown and A. K. McConnell

SHORT COMMUNICATIONS

431 **Arterial Oxygen Pressure Following Whole-Body Vibration at Altitude**
T. A. S. Hansen, J. I. Käsin, A. Edvardsen, C. C. Christensen, and A. S. Wagstaff

436 **Critical Care Aeromedical Evacuation Staff in Batang Airport After the Yushu Earthquake at High Altitude**
X. Liu, L. Zhang, Y. Liu, P. Kang, and Z. Liu

441 **Crew Resource Management: Using Aviation Techniques to Improve Operating Room Safety**
M. A. Ricci and J. R. Brumsted

CASE REPORT

445 **Rethinking Nephrolithiasis in Military Aviation**
S. B. Hari and M. S. Morrow

FEATURES

449 **Book Review**

450 **NASA Human Research Program Summaries: Understanding the Determinants of Cataract Induction and Progression in Exploration Spaceflight**—*M. A. Frey*

452 **Science & Technology Watch: Biological Databases as Research Tools in the Post-Genomic Era**—*I. Toby*

454 **You're the Flight Surgeon**—*S. D. Zaleski*

456 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

MAY 2012

RESEARCH ARTICLES

465 **Cardiovascular Risk Score and Cardiovascular Events Among Airline Pilots: A Case-Control Study**
I. M. A. Wirawan, P. D. Larsen, S. Aldington, R. F. Griffiths, and C. J. Ellis

472 **Heat Production and Heat Loss Responses to Cold Water Immersion After 35 Days Horizontal Bed Rest**
I. B. Mekjavic, S. N. Kounalakis, M. E. Keramidas, G. Biolo, M. Narici, and O. Eiken

477 **Cognitive Cues and Visually Induced Motion Sickness**
J. F. Golding, K. Doolan, A. Acharya, M. Tribak, and M. A. Gresty

483 **Hypergravity Conditioning on Ileal Movements in Rats**
M. Kimoto, J. L. Zeredo, and K. Toda

488 **Cardiovascular and Pulmonary Responses to Increased Acceleration Forces During Rest and Exercise**
D. R. Pendergast, A. Olszowka, and L. E. Farhi

496 **Flight Experience and the Perception of Pitch Angular Displacements in a Gondola Centrifuge**
A. Tribukait and O. Eiken

504 **High Sensitivity C-Reactive Protein in Airline Pilots with Metabolic Syndrome**
C. Alonso-Rodríguez and J. Medina-Font

509 **Common Mental Disorders Among Civil Aviation Pilots**
D. Feijó, R. R. Luiz, and V. M. Camara

REVIEW ARTICLE

514 **The Occupational Health and Safety of Flight Attendants**
R. F. Griffiths and D. M. C. Powell

CASE REPORTS

522 **Gnatho-Postural Treatment in an Air Force Pilot**
A. Baldini, S. Tecco, D. Cioffi, A. Rinaldi, and S. Longoni

527 **Aeromedical Evacuation Using an Aircraft Transit Isolator of a Patient with Lassa Fever**
E. Lotz and H. Raffin

LETTER TO THE EDITOR

531 **Application of Exhaled Nitric Oxide in Pulmonary Oxygen Toxicity**

FEATURES

533 **Book Reviews**

534 **NASA Human Research Program Summaries: Optimizing Vitamin D Supplementation in an Environment Without UV Light Exposure**—*M. A. Frey*

537 **Science & Technology Watch: Neuroprosthetics**—*K. M. Pappas and J. R. DeVoll*

539 **You're the Flight Surgeon**—*H. C. Bruntmyer*

542 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

JUNE 2012

RESEARCH ARTICLES

549 **Oculo-Vestibular Recoupling Using Galvanic Vestibular Stimulation to Mitigate Simulator Sickness**
M. J. Cevette, J. Stepanek, D. Cocco, A. M. Galea, G. N. Pradhan, L. S. Wagner, S. R. Oakley, B. E. Smith, D. A. Zapala, and K. H. Brookler

556 **Modafinil as a Replacement for Dextroamphetamine for Sustaining Alertness in Military Helicopter Pilots**
A. Estrada, A. M. Kelley, C. M. Webb, J. R. Athy, and J. S. Crowley

565 **Transient Global Amnesia and Its Aeromedical Implications**
T. Jagathesan and M. D. O'Brien

570 **Moderate Exercise Effects on Orthostatic Intolerance While Wearing Protective Clothing**
C. Jimenez, J. O. Fortrat, B. Delapierre, and B. Melin

577 **Heart Rate and Daily Physical Activity with Long-Duration Habitation of the International Space Station**
K. S. Fraser, D. K. Greaves, J. K. Shoemaker, A. P. Blaber, and R. L. Hughson

585 **Modeling Peripheral Vision for Moving Target Search and Detection**
J. H. Yang, J. Huston, M. Day, and I. Balogh

SHORT COMMUNICATIONS

594 **Predictors of Ear Barotrauma in Aircrews Exposed to Simulated High Altitude**
F. Morgagni, A. Autore, A. Landolfi, M. Ciniglio Appiani, and G. Ciniglio Appiani

598 **Acceptable Levels for Ingestion of Dimethylsilanediol in Water on the International Space Station**
R. Ramanathan, J. T. James, and T. McCoy

604 **A Predictive Logistic Regression Equation for Neck Pain in Helicopter Aircrew**
M. F. Harrison, J. P. Neary, W. J. Albert, and J. C. Croll

CASE REPORT

609 **Repeated Hypoxic Syncope in a Helicopter Pilot at a Simulated Altitude of 18,000 Feet**
K-T. Chiang, C-S. Yang, W-Y. Chiou, and H. Chu

TECHNICAL NOTE

614 **Blood Pressure Measurement for Accurate Assessment of Patient Status in Emergency Medical Settings**
V. A. Convertino

FEATURES

620 **Book Reviews**

621 **NASA Human Research Program Summaries: Effects of "Space-Like" Radiation on Central Nervous System Function**—*M. A. Frey*

623 **Science & Technology Watch: New Technology Developments for Improving Helicopter Operational Safety in Degraded Visual Environments**—*D. G. Newman and T. McMahon*

625 **You're the Flight Surgeon**—*B. D. Pruett*

627 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

JULY 2012

RESEARCH ARTICLES

637 **Acute Hypobaric-Hypoxia Challenge and Salivary Cortisol and DHEA-S in Healthy Male Subjects**
S. Pontremolesi, R. Biselli, G. Ciniglio Appiani, F. D'Amelio, S. Simona, and F. R. Patacchioli

643 **Gender Influence on the Performance of Chest Compressions in Simulated Hypergravity and Microgravity**
M. Kordi, N. Kluge, M. Kloeckner, and T. Russomano

649 **Heat Acclimation and Performance in Hypoxic Conditions**
Y. Heled, A. Peled, R. Yanovich, E. Shargal, R. Pilz-Burstein, Y. Epstein, and D. S. Moran

654 **Galvanic Vestibular Stimulation and the Ability to Maintain Arm-Hand Posture**
F. Pu, Y. Yang, D. Li, S. Li, Y. Li, and Y. Fan

660 **Cardiovascular Drift and $\dot{V}O_{2max}$ During Cycling and Walking in a Temperate Environment**
J. E. Wingo, L. J. Salaga, M. K. Newlin, and K. J. Cureton

667 **Local Intravascular Pressure Habituation in Relation to G-Induced Arm Pain**
O. Eiken, I. B. Mekjavic, and R. Kölegård

673 **Pulmonary Artery Pressure Increases During Commercial Air Travel in Healthy Passengers**
T. G. Smith, N. P. Talbot, R. W. Chang, E. Wilkinson, A. H. Nickol, D. G. Newman, P. A. Robbins, and K. L. Dorrington

REVIEW ARTICLE

677 **Differences in Cardio-Ventilatory Responses to Hypobaric and Normobaric Hypoxia: A Review**
N. A. Richard and M. S. Koehle

SHORT COMMUNICATIONS

685 **Cognition Enhancement by Modafinil: A Meta-Analysis**
A. M. Kelley, C. M. Webb, J. R. Athy, S. Ley, and S. Gaydos

691 **Outcome Measure to Assess Head-Down Bed Rest Subject Performance**
J. M. P. Poritz, K. A. Seaton, S. B. Zanello, and R. L. Cromwell

696 **Pneumatic Muscle Actuator (PMA) Task-Specific Resistance for Potential Use in Microgravity Exercise**
K. L. Hall, C. A. Phillips, D. B. Reynolds, S. R. Mohler, and A. T. Neidhard-Doll

702 **Back Symptoms in Aviators Flying Different Aircraft**
A. Grossman, I. Nakdimon, L. Chapnik, and Y. Levy

CASE REPORT

706 **Atrial Fibrillation in Two Jet Pilots During Aircrew Periodical Medical Examination**
C. Ozturk, A. Akin, S. Metin, T. Cakmak, and A. Sen

FEATURES

711 **Book Reviews**

712 **NASA Human Research Program Summaries: Developing a Food System for Exploration Spaceflight** —*M. A. Frey*

715 **Science & Technology Watch: High Performance Computing in Aerospace Medicine**—*E. M. Forster*

717 **You're the Flight Surgeon**—*L. R. Boyd*

719 **You're the Flight Surgeon**—*J. Reaume*

722 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

AUGUST 2012

RESEARCH ARTICLES

739 **Ten Years of Spatial Disorientation in U.S. Army Rotary-Wing Operations**
S. J. Gaydos, M. J. Harrigan, and A. J. R. Bushby

746 **Initial Heat Stress on Subsequent Responses to Cold Water Immersion While Wearing Protective Clothing**
H. Færevik and R. E. Reinertsen

751 **Influence of Posture on the Regulation of Cerebral Perfusion**
J. C. Gelinas, K. R. Marsden, Y. C. Tzeng, J. D. Smirl, K. J. Smith, C. K. Willie, N. C. Lewis, G. Binsted, D. M. Bailey, A. Bakker, T. A. Day, and P. N. Ainslie

758 **Physiological Responses of Astronaut Candidates to Simulated +G_x Orbital Emergency Re-Entry**
B. Wu, Y. Xue, P. Wu, Z. Gu, Y. Wang, and X. Jing

764 **Drugs and Alcohol Found in Civil Aviation Accident Pilot Fatalities from 2004–2008**
D. V. Canfield, K. M. Dubowski, A. K. Chaturvedi, and J. E. Whinnery

771 **Reliability of Plasma D-Dimers for Predicting Severe Neurological Decompression Sickness in Scuba Divers**
E. Gempp, J. Morin, P. Louge, and J. E. Blatteau

776 **Flight Hours and Flight Crew Performance in Commercial Aviation**
M. A. Todd and M. J. W. Thomas

783 **An Exercise Protocol Designed to Control Energy Expenditure for Long-Term Space Missions**
T. Matsuo, K. Ohkawara, S. Seino, N. Shimojo, S. Yamada, H. Ohshima, K. Tanaka, and C. Mukai

SHORT COMMUNICATIONS

790 **Cerebral Near-Infrared Spectroscopy to Evaluate Anti-G Straining Maneuvers in Centrifuge Training**
A. Kobayashi, A. Kikukawa, M. Kimura, T. Inui, and Y. Miyamoto

795 **Prediction of Crew Health Effects from Air Samples Taken Aboard the International Space Station**
J. T. James and S. M. Zalesak

800 **Fatigue Reporting Among Aircrew: Incidence Rate and Primary Causes**
S. Houston, K. Dawson, and S. Butler

CASE REPORT

805 **Peripheral Neuropathy of the Extremity After Hyperbaric Exposure**
M. M. Garland, A. Gutierrez, and D. M. Barratt

COMMENTARY

809 **Commercial Air Travel After Intraocular Gas Injection**
S. Houston, J. Graf, and J. Sharkey

FEATURES

811 **Book Reviews**

812 **NASA Human Research Program Summaries: Assessing Neuromuscular Function of Astronauts (and Others) After "Unweighting"**—*M. A. Frey*

814 **You're the Flight Surgeon**—*R. Craig-Gray*

816 **You're the Flight Surgeon**—*N. Restivo*

817 **Erratum**

818 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

819 **Abstracts Not Presented**

SEPTEMBER 2012

RESEARCH ARTICLES

841 **Role of Carotid Baroreflex and Sympathetic Responses in the Push-Pull Effect: A Simulation Study**
Y. Liu, L-F. Zhang, K-L. Zhang, and H-B. Lu

850 **Pilot Expertise and Hippocampal Size: Associations with Longitudinal Flight Simulator Performance**
M. M. Adamson, P. J. Bayley, B. K. Scanlon, M. E. Farrell, B. Hernandez, M. W. Weiner, J. A. Yesavage, and J. Taylor

858 **CT Examination of the Pericardium and Lungs in Helicopter Pilots Exposed to Vibration and Noise**
J. I. Kåsin, T. O. Kjellevand, J. Kjekshus, G. B. Nesheim, and A. Wagstaff

865 **Asymptomatic Brain Lesions in Pilots: A Comparative Study with Non-Flying Personnel Using Brain MRI**
D. Lim, J. Park, W-H. Choi, D-H. Bang, O. Jung, and S. Kang

872 **Digestive Functional Symptoms Among Commercial Pilots in Relation to Diet, Insomnia, and Lifestyle Factors**
T. Lindgren, R. Runeson, K. Wahlstedt, G. Wieslander, B-G. Dammström, and D. Norbäck

REVIEW ARTICLE

879 **Low Back Pain: Considerations for Rotary-Wing Aircrew**
S. J. Gaydos

SHORT COMMUNICATIONS

890 **An Emergency Medical Planning Guide for Commercial Spaceflight Events**
J. Law and J. Vanderploeg

896 **Low-Dose Chest Computed Tomography as a Screening Tool: Findings in 536 Aircrews**
D-H. Bang, D. Lim, O-M. Jeong, W-S. Hwang, J-Y. Jung, and J. Lim

CASE REPORT

899 **High Altitude Induced Bilateral Non-Traumatic Subdural Hematoma**
L. Ganau, L. Prisco, and M. Ganau

TECHNICAL NOTE

902 **An Independent, Objective Calibration Check for the Reduced Oxygen Breathing Device**
D. L. Still and L. A. Temme

COMMENTARY

909 **Major Depression and Fitness to Fly by Different Aviation Authorities**
A. Vuorio, T. Laukkala, and P. Navathe

LETTER TO THE EDITOR

912 **Accuracy of Physiological Altitude Simulation**

FEATURES

914 **NASA Human Research Program Summaries: Effectiveness of Combined Resistance Exercise Training and Alendronate Treatment to Lessen or Prevent Spaceflight-Induced Bone Loss**—*M. A. Frey*

916 **Science & Technology Watch: CAMI Tools and Services for Evaluating Space Weather**—*K. A. Copeland*

918 **You're the Flight Surgeon**—*W. A. Hayes II*

919 **You're the Flight Surgeon**—*N. V. T. Tran*

922 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

OCTOBER 2012

RESEARCH ARTICLES

929 **Commercial Spaceflight Participant G-Force Tolerance During Centrifuge-Simulated Suborbital Flight**
R. S. Blue, J. M. Riccitello, J. Tizard, R. J. Hamilton, and J. M. Vanderploeg

935 **Hemodynamic and Thermoregulatory Responses to Lower Body Water Immersion**
M. D. Muller, C-H. Kim, Y. Seo, E. J. Ryan, and E. L. Glickman

942 **Intermittent Normobaric Hypoxic Exposures at Rest: Effects on Performance in Normoxia and Hypoxia**
I. B. Mekjavic, T. Debevec, M. Amon, M. E. Keramidas, and S. N. Kounalakis

951 **Doppler Bubble Grades After Diving and Relevance of Body Fat**
N. A. M. Schellart, T. P. van Rees Vellinga, F. J. van Dijk, and W. Sterk

958 **Stability of Laser-Assisted In Situ Keratomileusis (LASIK) at Altitude**
M. Aaron, S. Wright, J. Gooch, R. Harvey, R. Davis, and C. Reilly

962 **Hypoxia Training: Symptom Replication in Experienced Military Aircrew**
B. J. Johnston, G. S. Iremonger, S. Hunt, and E. Beattie

968 **Altitude Decompression Sickness Incidence Among U-2 Pilots: 1994–2010**
G. L. Hundemer, S. L. Jersey, R. P. Stuart, W. P. Butler, and A. A. Pilmanis

REVIEW ARTICLES

975 **Hypoxic Hypoxia at Moderate Altitudes: Review of the State of the Science**
F. A. Petrassi, P. D. Hodkinson, P. L. Walters, and S. J. Gaydos

985 **The Influence of Nontraditional Training Modalities on Physical Performance: Review of the Literature**
R. B. O'Hara, J. Serres, K. L. Traver, B. Wright, C. Vojta, and E. Eveland

SHORT COMMUNICATIONS

991 **Education and Experience of Army Flight Medics in Iraq and Afghanistan**
S. Bier, E. Hermstad, C. Trollman, and M. Holt

995 **Virtual Guidance as a Tool to Obtain Diagnostic Ultrasound for Spaceflight and Remote Environments**
D. S. Martin, T. L. Caine, T. Matz, S. M. C. Lee, M. B. Stenger, A. E. Sargsyan, and S. H. Platts

1001 **A Study of Airline Pilot Morbidity**
A. J. Sykes, P. D. Larsen, R. F. Griffiths, and S. Aldington

COMMENTARY

1006 **Aeromedical Decision Making—It May Be Time for a Paradigm Change**
L. W. Steinkraus, R. Rayman, W. P. Butler, R. W. Marsh, W. Ercoline, and C. T. Cowl

LETTER TO THE EDITOR

1008 **In Response to Accuracy of Physiological Altitude Simulation**

FEATURES

1009 **NASA Human Research Program Summaries: Diagnostic Ultrasound for Spaceflight**—*M. A. Frey*

1011 **Science & Technology Watch: Effect of Hypergravity Simulation on Carrot Germination and Growth**—*M. A. dos Santos, F. N. S. Fachel, M. J. A. Nava, L. V. Astarita, P. Collin, and T. Russomano*

1013 **You're the Flight Surgeon**—*D. W. Peake*

1015 **You're the Flight Surgeon**—*J. P. Lynch*

1019 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

NOVEMBER 2012

REVIEW ARTICLE

1025 **Nanotechnologies and Regenerative Medical Approaches for Space and Terrestrial Medicine**
A. Grattoni, E. Tasciotti, D. Fine, J. S. Fernandez-Moure, J. Sakamoto, Y. Hu, B. Weiner, M. Ferrari, and S. Parazynski

RESEARCH ARTICLES

1037 **Differential Response of the Gastrocnemius and Soleus Muscles of Rats to Chronic Hypobaric Hypoxia**
P. Chaudhary, G. Suryakumar, Y. K. Sharma, and G. Ilavazhagan

1044 **Changes in Central Corneal Thickness, Intraocular Pressure, and Oxidation/Antioxidation Parameters at High Altitude**
S. Karkucuk, M. Mujdeci, G. Baskol, H. Arda, K. Gumus, and A. Oner

1049 **Ligustrazine and the Contractile Properties of Soleus Muscle in Hindlimb-Unloaded Rats**
S. Li, Z. Yang, Y. Gao, G. Li, H. Wang, and H. G. Hinghofer-Szalkay

1055 **Electrocardiographic Abnormalities in Medically Screened Military Aircrew**
C. J. Boos, Y. Jamil, M. Park, W. Moy, M. Khanna, A. C. Timperley, and S. Sharma

1060 **Risk Factors for Musculoskeletal Injuries for Soldiers Deployed to Afghanistan**
T. C. Roy, J. J. Knapik, B. M. Ritland, N. Murphy, and M. A. Sharp

1067 **Forehead-Mounted Reflectance Oximetry for In-Cockpit Hypoxia Early Detection and Warning**
R. G. Simmons, J. F. Chandler, and D. S. Horning

1077 **Clothing Buoyancy and Underwater Horizontal Swim Distance After Exiting a Submersed Vehicle Simulator**
D. Gagnon, G. K. McDonald, T. Pretorius, and G. G. Giesbrecht

REVIEW ARTICLE

1084 **Acute Neurological Symptoms During Hypobaric Exposure: Consider Cerebral Air Embolism**
R. P. Weenink, M. W. Hollmann, and R. A. van Hulst

SHORT COMMUNICATION

1092 **+G_z-Induced Spinal Symptoms in Fighter Pilots: Operational and Individual Associated Factors**
A. S. Wagstaff, K. I. Jahr, and S. Roskier

CASE REPORT

1097 **Superior Vestibular Dysfunction in Severe Decompression Sickness Suggests an Embolic Mechanism**
L. Verrecchia, M. Gennser, A. Tribukait, and K. Brantberg

FEATURES

1101 **Book Reviews**

1102 **NASA Human Research Program Summaries: Crew Autonomy for Future Exploration Spaceflight**—*M. A. Frey*

1104 **Science & Technology Watch: Airborne Visibility Indicator System**—*A. Estrada, and J. S. Crowley*

1106 **You're the Flight Surgeon**—*J. A. Ouma*

1107 **You're the Flight Surgeon**—*J. Lopez*

1110 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

DECEMBER 2012

RESEARCH ARTICLES

1117 **Hyperintense White Matter Lesions in 50 High-Altitude Pilots With Neurologic Decompression Sickness**
S. A. McGuire, P. M. Sherman, A. C. Brown, A. Y. Robinson, D. F. Tate, P. T. Fox, and P. V. Kochunov

1123 **Gaze Control and Vestibular-Cervical-Ocular Responses After Prolonged Exposure to Microgravity**
L. N. Kornilova, I. A. Naumov, K. A. Azarov, and V. N. Sagalovitch

1135 **Lasers' Spectral and Temporal Profile Can Affect Visual Glare Disability**
J. M. A. Beer and D. A. Freeman

1145 **Susceptibility of the Inner Ear Structure to Shunt-Related Decompression Sickness**
M. Ignatescu, P. Bryson, and C. Klingmann

REVIEW ARTICLE

1152 **Maladaptive Behavior in Survivors: Dysexecutive Survivor Syndrome**
J. Leach

SHORT COMMUNICATIONS

1162 **Space and Motion Perception and Discomfort in Air Travel**
R. T. Ramos, D. A. de Mattos, J. T. S. Rebouças, and R. D. Ranvaud

1167 **Professional Aircrews' Attitudes Toward Infectious Diseases and Aviation Medical Issues**
M. D. Schwartz, L. Z. Macias-Moriarity, and J. Schelling

CASE REPORT

1171 **A Fighter Pilot Case of Pulmonary Sequestration**
L. Cui, X-R. Xu, J-G. Chu, Z-J. Fu, Y-M. Bi, and J-C. Wang

TECHNICAL NOTE

1176 **A Modified Technique of Rat Tail Suspension for Longer Periods of Observation**
M. J. Falcai, M. J. Q. Louzada, F. J. A. de Paula, R. Okubo, and J. B. Volpon

HISTORICAL NOTE

1181 **Louis H. Bauer and the Origins of Civil Aviation Medicine**
T. L. Kraus

COMMENTARY

1184 **Pilot Mental Health: Expert Working Group Recommendations**
Aerospace Medical Association Ad Hoc Working Group on Pilot Mental Health

LETTER TO THE EDITOR

1186 **Bi-Lateral Non-Traumatic Subdural Hematoma**

FEATURES

1188 **NASA Human Research Program Summaries: Effects of Solar Particle Event Protons on Human Cells**—*M. A. Frey*

1190 **Science & Technology Watch: Mechanobiology**—*W. Fraser*

1192 **You're the Flight Surgeon**—*G. L. Ewing*

1194 **You're the Flight Surgeon**—*M. K. McPherson*

1196 **This Month in Aerospace Medicine History**—*W. W. Dalitsch III*

1201 **Indexes to Volume 83, January through December, 2012**

INDEXES TO VOLUME 83, 2012

Index to Subjects

A

Abstracts
  83rd Annual AsMA Scientific Meeting–165, 819
Acceleration
  $+G_x$ responses in astronaut candidates during simulated re-entry–758
  $+G_z$, centrifugation, and mood–136
  cardiovascular and pulmonary responses to gravity–488
  evaluation of anti-G straining maneuvers in centrifuge training–790
  participant tolerance in centrifuge-simulated suborbital flight–929
  vascular pressure habituation and G-induced arm pain–667
Accident investigations, maladaptive behaviors in survivors–1152
Accidents, aviation
  Drift into Failure: From Hunting Broken Components to Understanding Complex Systems (Book Review)–149
  drugs and alcohol in civil aviation pilot fatalities–764
  spatial disorientation in U.S. Army rotary wing operations–739
  victim fragmentation patterns and seat location data–412
Acoustic neuroma–919
Activity monitors, and heart rate on International Space Station–577
Acute mountain sickness
  ophthalmologic changes at high altitude–1044
  responses to hypobaric and normobaric hypoxia–677
Addison's disease–539
Adiposity, and Doppler bubble grades after diving–951
Adolescence, altitude training and oxygen capacity in young athletes–50
Adrenal insufficiency, autoimmune polyglandular syndrome type 2–816
Adrenocortical insufficiency, Addison's disease in a pilot–539
Aerobic training, influence on physical performance–985
Aeromedical disposition
  Addison's disease–539
  allergic fungal sinusitis with nasal polyps and cavitary lesion–717
  aortic aneurysm–1013
  atrial fibrillation in jet pilots during periodic medical exam–706
  autoimmune polyglandular syndrome type 2–816
  decision making paradigms–1006
  depression, major–909
  diplopia–154
  endocarditis–1013
  flying phobia, sudden onset of–1106
  idiopathic urticaria–72
  kidney stones and bladder cancer–719
  leishmaniasis in military aircrew member in Pakistan–454
  migraine aura without headache–1194
  nephrolithiasis policies in military aviation–445
  nonarteritic ischemic optic neuropathy–625
  ocular hypertension–1106
  prostate cancer–918
  pulmonary embolism–1192
  pulmonary sequestration–1171
  seizure risk after traumatic brain injury–140
  transient global amnesia in pilots–565
Aeromedical evacuation
  Army flight medics in Iraq and Afghanistan–991
  critical care AE staff at high altitude after China earthquake–436
  Lassa fever patient using aircraft transit isolator–527
Aerospace Medical Association (AsMA)
  83rd Annual AsMA Scientific Meeting Program and Abstracts–165, 819
  News–75, 157, 457, 543, 629, 723, 821, 923, 1021, 1111, 1197
  Working Group on Pilot Mental Health recommendations–1184
Aerospace medicine
  high performance computing in–715
  nanotechnologies and regenerative medicine in space–1025
  neuroprosthetics in–537
  Sitting Kills, Moving Heals: How Simple Everyday Movement Will Prevent Pain, Illness, and Early Death–and Exercise Alone Won't (Book Review)–533
  The Neurosciences and the Practice of Aviation Medicine (Book Review)–620
  This Month in History of–74, 156, 456, 542, 627, 722, 818, 922, 1019, 1110, 1196
Afghanistan
  flight crew spatial orientation survey results–383
  risk factors for musculoskeletal injuries in soldiers in–1060
  survey of Army flight medics in–991
Africa, evacuation of Lassa fever patient using aircraft transit isolator–527
Age
  body fat and Doppler bubble grades after diving–951
  G-force tolerance in centrifuge-simulated suborbital flight–929
Agility training
  influence on physical performance–985
Air ambulance--*See* Aeromedical evacuation
Air embolism–*See also* Gas embolism
  cerebral arterial gas embolism during hypobaric exposure–1084
Air pollution, prediction of crew health from space station air samples–795
Air travel
  professional aircrews' attitudes toward infectious diseases–1167
  space and motion perception and discomfort in–1162, E1(Dec)
Airborne visibility indicator system–1104
Aircraft
  airborne visibility indicator system–1104
  back pain in aviators flying different–702
  crash fragmentation patterns and seat location–412
  hypoxic hypoxia at moderate altitudes in unpressurized–975
Aircrew--*See also* Pilots
  active tuberculosis in aircraft cabin crew–61
  attitudes toward infectious diseases and self-grounding–1167
  ear barotrauma at simulated high altitude–594

Page numbers preceded by an "E" indicate supplemental material for individual articles that can be found online at www.asma.org/publications/asem-journal/read-the-journal.

ECG abnormalities in medically screened military–1055
fatigue reporting among aircrew–800
low back pain in rotary-wing aircrew–879
low-dose chest CT as screening tool for–896
predictive logistic regression for neck pain in helicopter–604
seizure risk after traumatic brain injury–140
symptom replication in hypoxia training in experienced military–962
Alcohol
civil aviation accident pilot fatalities and–764
high altitude-induced bilateral non-traumatic subdural hematoma and–899
Alendronate, and resistance exercise to prevent bone loss–914
Alertness, modafinil use in military helicopter pilots–556, E1(June)
Allergies, fungal sinusitis with nasal polyps and cavitary lesion–717
Altitude effects
accuracy of physiological altitude simulation (Letters)–912, 1008
arterial oxygen pressure after whole-body vibration–431
asymptomatic brain lesions in pilots–865
critical care aeromedical evacuation staff after China earthquake and–436
bilateral non-traumatic subdural hematoma–899, 1182 (Letter)
cerebral arterial gas embolism during hypobaric exposure–1084
during training in adolescent alpine skiers–50
ear barotrauma in aircrews–594
hyperintense white matter lesions on MRI in U-2 pilots–1117
hypoxic hypoxia at moderate altitudes–975
ophthalmologic changes at high altitude–1044
rat muscle responses to chronic hypobaric hypoxia–1037
repeated hypoxic syncope in helicopter pilot–609
stability of LASIK and–958
symptom replication in hypoxia training in experienced military aircrew–962
American Airlines Flight 587, victim fragmentation patterns and seat location data–412
Analgesics, for space adaptation back pain–2
Aneurysm, aortic, in a pilot–1013
Animal models
gender differences in antipyrine pharmacokinetics–8
hypergravity and ileal movements in rats–483
ligustrazine in hindlimb-unloaded rats–1049
modified technique of rat tail suspension–1176
response of rat muscles to chronic hypobaric hypoxia–1037
skeletal effects of radiation with musculoskeletal disease–150
Antarctica, vitamin D supplementation in–534
Anthropometrics, changes in physical fitness in Air Force cadets–35
Anti-G straining maneuvers, evaluation in centrifuge training–790
Anti-G suits, vascular pressure habituation and G-induced arm pain–667
Anticoagulation therapy, pulmonary embolism in a pilot–1192
Antidepressant medications, and fitness to fly–909
Antipyrine, gender differences in pharmacokinetics in simulated weightlessness–8
Anxiety
measurement in divers using novel task–54
space and motion perception and discomfort in air travel–1162, E1(Dec)
Arm pain, vascular pressure habituation and G-induced–667
Arm-hand posture, galvanic vestibular stimulation and–654
Arterial gas embolism, simulation of hematocrit effects on dynamics of–92
Arterial oxygen pressure, after whole-body vibration at altitude–431
Astigmatism, stability of phakic intraocular lens implant in high $+G_z$–144
Astronauts--*See also* Spaceflight
assessing neuromuscular function after "unweighting"–812
crew autonomy for future exploration missions–1102
estimating outcomes with myocardial infarction in long-duration missions–79
exercise protocol to control energy expenditure–783
gaze control after prolonged exposure to microgravity–1117
prediction of crew health from space station air samples–795
simulated $+G_x$ orbital emergency re-entry in candidates–758
space adaptation back pain in–2
space shuttle flight crew spatial orientation survey results–383
Atrial fibrillation, in two jet pilots during periodic medical exam–706
Autoimmune diseases, polyglandular syndrome type 2–816
Autonomic nervous system
heart rate variability during simulated mission to Mars–125
responses in push-pull maneuver–841
Autonomy, for crews on future exploration missions–1102
Aviation
accidents--See Accidents, aviation
assessing severity and implications of color vision loss–19
Human Error in Aviation (Book Review) –1101
Into the Blue: American Writing on Aviation and Spaceflight (Book Review)–711
military--See Military pilots
safety--See Safety, aviation
Simulation in Aviation Training (Book Review)–1101
Situational Awareness (Book Review)–811
The Neurosciences and the Practice of Aviation Medicine (Book Review)–620
Aviation medical examiners, history of–1181

B

Back pain
in aviators flying different aircraft–702
in commercial airline pilots (Letter)–67
low, in rotary-wing aircrew–879
space adaptation in astronauts–2
Ballistic re-entry, physiologic responses of astronaut candidates to–758
Baroreflex sensitivity, orthostatic intolerance while wearing protective clothing–570
Barotrauma, of ear in aircrews at simulated high altitude–594
Basic life support, gender differences in performance in microgravity–643
Bauer, Louis H, and origins of civil aviation medicine–1181
Bed rest studies--*See* Head-down bed rest model
Behavior, maladaptive, in survivors–1152
Behaviorally anchored rating scales, for performance in head-down bed rest–691
Biomarkers, D-dimers and neurologic decompression sickness in Scuba divers–771
Biomedical research
biological databases as tools in post-genomic era–452
cloud computing in–152

Biomimetic actuator, use in microgravity–696
BioNanoScaffolds, for regenerative nanomedicine–1025
Bisphosphonates, alendronate during spaceflight–914
Bladder cancer, and kidney stones in a pilot candidate–719
Bleb, on low-dose chest CT of aircrew–896
Blood pressure
  effect of sleep loss and heat acclimation on orthostatic hypotension–403
  measurement technologies in emergency medical settings–614
  responses to lower body water immersion–935
Body mass index, and Doppler bubble grades after diving–951
Bone loss
  modified rat tail suspension technique for longer periods–1176
  resistance exercise and alendronate to prevent–914
  vitamin D supplementation in environment without UV light exposure–534
Bone recovery, enhancement after spaceflight–68
Book Reviews
  Burt Rutan's Race to Space: The Magician of Mojave and His Flying Innovations (Book Review)–449
  Drift into Failure: From Hunting Broken Components to Understanding Complex Systems (Book Review)–149
  Handbook of Human-Machine Interaction (Book Review)–811
  Human Error in Aviation (Book Review)–1101
  Into the Blue: American Writing on Aviation and Spaceflight (Book Review)–711
  On Being a Scientist: A Guide to Responsible Conduct in Research (Book Review)–811
  Psychology of Space Exploration (Book Review)–711
  Simulation in Aviation Training (Book Review)–1101
  Sitting Kills, Moving Heals: How Simple Everyday Movement Will Prevent Pain, Illness, and Early Death--and Exercise Alone Won't (Book Review)–533
  Situational Awareness (Book Review)–811
  The Neurosciences and the Practice of Aviation Medicine (Book Review)–620
  The Pox and the Covenant (Book Review)–620
  Through the Eyes of a Tiger: An Army Flight Surgeon's Vietnam Journal (Book Review) –533
Brain lesions—*See also* Neurology
  asymptomatic in pilots–865
Breathing, respiratory-related limitations in physically demanding occupations–424
Brownouts, operational safety of helicopters in–623
Bruxism, gnatho-postural treatment–522
Bubbles
  body fat and Doppler bubble grades after diving–951
  microembolism in inner ear decompression sickness–1097
  pre-dive exercise and post-dive venous gas emboli–30
Bullae, seen on low-dose chest CT of aircrew–896
Buoyancy, of flotation clothing after exiting submersed vehicle–1077

C

C-reactive protein, in airline pilots with metabolic syndrome–504
Cabin, space and motion perception and discomfort in air travel–1162, E1(Dec)
Cabin crew--*See* Aircrew *and* Flight attendants
Calculi, rethinking nephrolithiasis policies in military aviation–445
Calibration, of reduced oxygen breathing device–903
Cancer
  bladder, and kidney stones in a pilot candidate–719
  prostate, aeromedical disposition in a pilot–918
  risk in flight attendants (Letter)–148, 514
Carbon dioxide, propranolol and survival time in disabled submarines–131
Cardiac output
  propranolol and survival time in disabled submarines–131
  response to increased acceleration forces–488
Cardiology
  aortic aneurysm in a pilot–1013
  atrial fibrillation in two jet pilots–706
  cardiovascular and pulmonary responses to gravity–488
  cardiovascular drift and oxygen uptake during exercise–660
  cardiovascular risk score in airline pilots–465
  ECG abnormalities in medically screened military aircrew–1055
  endocarditis in a pilot–1013
  estimating outcomes of myocardial infarction on long-duration missions–79
  heart rate variability during simulated mission to Mars–125
  responses to hypobaric and normobaric hypoxia–677
Cardiopulmonary resuscitation (CPR), gender differences in performance in microgravity–643
Cardiovascular disease—*See also* Cardiology
  C-reactive protein in airline pilots with metabolic syndrome–504
Cardiovascular drift, oxygen uptake during cycling and walking and–660
Cardiovascular risk score, cardiovascular events in airline pilots and–465
Carotid baroreflex, sympathetic responses in push-pull maneuver–841
Carrots, effects of hypergravity on germination and growth–1011
Cataracts, determinants of induction and progression in exploration spaceflight–450
Central nervous system (CNS)—*See also* Neurology
  effects of "space-like" radiation on function of–621
Centrifuge training
  $+G_z$, centrifugation, and mood–136
  effect of flight experience on perceived pitch position–496
  evaluation of anti-G straining maneuvers in–790
  G-force tolerance in simulated suborbital flight–929
  squat exercise biomechanics in artificial gravity–102
  stability of phakic intraocular lens implant in high $+G_z$–144
Cerebral arterial gas embolism, during hypobaric exposure–1084
Cerebral blood flow, influence of posture on regulation of–751
Cerebral oxygenation, and anti-G straining maneuvers in centrifuge training–790
Cerebral perfusion, effect of posture on regulation of–751
Certification, medical, of flight attendants–514
Chest compressions, gender differences in performance in microgravity–643
Chest CT, low-dose, as tool for screening aircrew–896
China, aeromedical evacuation staff at high altitude after earthquake–436
Cholera, in deployed settings–814
Choroidal thickness, subfoveal, measurement during head-down tilt–388
Circadian rhythms
  dysrhythmia, in flight attendants–514
  heart rate variability during simulated mission to Mars–125
Civil Aerospace Medical Institute (CAMI)
  tools and services for evaluating space weather–916
Civil aviation
  common mental health disorders among pilots–509

drugs and alcohol found in accidents with pilot fatalities–509
Louis H. Bauer and origins of civil aviation medicine–1181
Clothing--*See* Protective clothing
Cloud computing, in biomedical research–152
Cognitive impairment
transient global anemia–565
hypoxic hypoxia at moderate altitudes and–975
Cognitive performance
enhancement by modafinil–685
heat acclimation in hypoxic conditions and–649
Cold water immersion
buoyancy of flotation clothing for travel on ice roads–1077
hemodynamic and thermoregulatory responses to lower body–935
protective clothing, initial heat stress and response to–746
responses to after 35 days horizontal bed rest–472
Color Assessment and Diagnosis (CAD) test, assessing severity of color vision loss–19
Color vision loss, assessing severity of–19
Comfort, space and motion perception in air travel–1162, E1(Dec)
Commercial air travel
intraocular gas injection and–809
cosmic radiation exposure and cancer in flight attendants (Letter)–148
pulmonary artery pressure increases in healthy passengers–673
transient immune impairment after–418
tuberculosis contact tracing in cabin crew–61
victim fragmentation patterns and seat location data–412
Commercial airline pilots
annual incapacitation rate of–42
back pain in (Letter)–67
C-reactive protein and metabolic syndrome in–504
digestive functional symptoms among–872
flight hours and performance–776
study of morbidity in–1001
Commercial airlines
aircrews' attitudes toward infectious diseases–1167
fatigue reporting among aircrew–800
occupational health and safety of flight attendants–514
space and motion perception and discomfort in–1162, E1(Dec)
Commercial suborbital spaceflight
emergency medical planning guide for–890
participant G-force tolerance in centrifuge simulation–929
Complexity theory, *Drift into Failure: From Hunting Broken Components to Understanding Complex Systems* (Book Review)–149
Computed tomography (CT)
low-dose chest CT as aircrew screening tool–896
of pericardium and lungs in helicopter pilots exposed to vibration and noise–858
Computers
cloud computing in biomedical research–152
high performance computing in aerospace medicine–715
Contact tracing, active tuberculosis in aircraft cabin crew–61
Contagious infections, aeromedical evacuation using aircraft transit isolator–527
Contention scheduler, maladaptive behaviors in survivors–1152
Cooling rate, initial heat stress and response to cold water immersion–746
Coriolis forces, squat exercise biomechanics in artificial gravity–102
Corneal thickness, changes at high altitude–1044
Coronary artery calcification score, in astronauts with myocardial infarction on long-duration missions–79
Corporate airlines, aircrews' attitudes toward infectious diseases–1167
Cortisol/DHEA-S ratio, in acute hypobaric-hypoxia challenge–637
Cosmic radiation
CAMI tools and services for evaluating space weather–916
effects of "space-like" radiation on CNS function–621
Cosmic radiation exposure
cancer risk in flight attendants (Letter)–148, 514
effects on bone–150
Cosmonauts--*See also* Astronauts
gaze control after prolonged exposure to microgravity–1117
Countermeasures
energy expenditure and exercise by women in spaceflight–111
heart rate and physical activity on International Space Station–577
squat exercise biomechanics during centrifuge training–102
Crashes–See Accidents, aviation
Crew resource management, to improve operating room safety–441
Critical incident technique, to assess performance in head-down bed rest–691
Cybersickness, ocular-vestibular recoupling to mitigate–549
Cycling
cardiovascular drift and oxygen uptake during–660
exercise protocol to control energy expenditure in space–783
pre-dive, and post-dive venous gas emboli–30

D

D-dimers, predicting neurologic decompression sickness in scuba divers–771
Databases, biological, as research tools in post-genomic era–452
Deconditioning, squat exercise biomechanics during centrifuge training–102
Decompression illness
peripheral neuropathy of extremity in a hyperbaric tech–805
Decompression sickness
asymptomatic brain lesions in pilots–865
D-dimers for predicting severe neurologic–771
embolic mechanism for inner ear–1097
hyperintense white matter lesions in U-2 pilots with neurologic–1117
peripheral neuropathy of extremity in a hyperbaric tech–805
pre-dive exercise and post-dive venous gas emboli–30
simulation of hematocrit effects on arterial gas embolism dynamics–92
susceptibility of ear to shunt-related–1145
Dehydration, exercise and orthostatic intolerance in protective clothing–570
Dentistry, gnatho-postural treatment in Air Force pilot–522
Deployment
flight crew spatial orientation survey results–383
risk factors for musculoskeletal injuries in Afghanistan–1060
survey of Army flight medics in Afghanistan–991
Depression, major, and fitness to fly–909
Devices
calibration check for reduced oxygen breathing device–903
in-cockpit hypoxia early detection and warning–1067
Dexterity, measurement in divers using novel task–54
Dextroamphetamine, sustaining helicopter pilot alertness with modafinil–556, E1(June)
DHEA-S, salivary stress hormones in acute hypobaric-hypoxia challenge–637

Diet, effect on digestive symptoms in commercial pilots–872
Digestive symptoms, among commercial airline pilots–872
Dimethylsilanediol, levels in water on International Space Station–598
Diphosphoglycerate (2,3-DPG), altitude training and oxygen capacity in athletes–50
Diplopia, aeromedical disposition in an Air Force pilot–154
Disability, low back pain in rotary-wing aircrew–879
Disasters
  aeromedical evacuation staff at high altitude in China earthquake–436
  cholera in deployed settings–814
  emergency medicine planning guide for commercial spaceflight–890
  maladaptive behaviors in survivors–1152
Disuse atrophy, alleviating effect of ligustrazine on–1049
Diving
  body fat and Doppler bubble grades after–951
  measuring dexterity and anxiety in divers using novel task–54
  patent foramen ovale and inner ear decompression sickness–1145
  peripheral neuropathy of extremity after hyperbaric exposure–805
  plasma D-dimers and neurological decompression sickness–771
  pre-dive exercise and post-dive venous gas emboli–30
Doppler ultrasound
  Doppler bubble grades after diving–951
  pre-dive exercise and post-dive venous gas emboli–30
  temporal artery flow pattern as early indicator of syncope–394
  transcranial, effect of posture on cerebral perfusion–751
Drinking water, dimethylsilanediol levels on International Space Station–598
Drowning, buoyancy of flotation clothing for travel on ice roads–1077
Drug delivery, nanotechnology studies in space–1025
Drugs, *see also* Medications
  role in civil aviation accident pilot fatalities–764
Dry immersion suit, initial heat stress and response to cold water immersion in–746
Dysexecutive survivor syndrome–1152

E

Ear barotrauma, in aircrews at simulated high altitude–594
Ear, nose, and throat (ENT) disease
  acoustic neuroma in a pilot–919
  allergic fungal sinusitis with nasal polyps and cavitary lesion–717
  ear barotrauma in aircrews–594
  embolic mechanism for inner ear decompression sickness–1097
Education, see also Training, of Army flight medics in Iraq and Afghanistan–991
Egress, from submersed vehicle, buoyancy of flotation clothing for travel on ice roads–1077
Electrical stimulation, ocular-vestibular recoupling to mitigate simulator sickness–549
Electrocardiography, abnormalities in medically screened military aircrew–1055
Electromyography, predicting neck pain in helicopter aircrew–604
Embolism--*See* Gas embolism
Emergency medicine
  Army flight medics in Iraq and Afghanistan–991
  blood pressure measurement in–614
  planning guide for commercial spaceflight–890
Endocarditis, in a pilot–1013
Endocrine disorders, Addison's disease in a pilot–539
Endovascular treatment, of pulmonary sequestration in a fighter pilot–1171
Endurance training, effects of intermittent normobaric hypoxic exposures at rest–942
Energy expenditure
  exercise protocol to control for long-term space missions–783
  of gravity-independent high-speed resistive exercise by women–111
Epidemiology, drugs and alcohol in civil aviation accident pilot fatalities–764
Errors, medical, crew resource management to improve operating room safety–441
Erythropoietin, altitude training and oxygen capacity in young athletes–50
Evacuation--See Aeromedical evacuation
Evetts-Russomano method, gender differences in performance in microgravity–643
Exercise
  and heart rate on International Space Station–577
  cardiovascular and pulmonary responses to acceleration during–488
  cardiovascular drift and oxygen uptake–660
  effects on orthostatic intolerance while wearing protective clothing–570
  heat acclimation and performance in hypoxic conditions–649
  pneumatic muscle actuator use in microgravity–696
  pre-dive, and post-dive venous gas emboli–30
  protocol to control energy expenditure for long-term space missions–783
  resistance training and alendronate to lessen bone loss–914
  squat exercise biomechanics in artificial gravity–102
Exertional heat stroke, criteria for heat tolerance in women–58
Experience, flight hours and performance in commercial aviation–776
Expertise, effect on flight simulator performance–850
Exploration class space missions
  crew autonomy for future–1102
  determinants of cataract induction and progression in–450
  developing food system for–712
  estimating outcomes of astronauts with myocardial infarction on–79
  virtual guidance for diagnostic ultrasound on–995
Eyes-- See Ophthalmology

F

Fat, body, and Doppler bubble grades after diving–951
Fatigue
  development of "fatigualizer" to measure–70
  flight attendants and–514
  reporting among aircrew–800
  respiratory-related limitations in physically demanding occupations–424
  sustaining military helicopter pilot alertness with modafinil–556, E1(June)
Fighter pilots--*See also* Military pilots
  $+G_z$-induced neck pain in–1092
  pulmonary sequestration in–1171
Fitness to fly
  commercial air travel after intraocular gas injection–809
  different regulations for major depression–909
Flight attendants
  cosmic radiation exposure and cancer in (Letter)–148
  occupational health and safety of–514
Flight medics, Army, in Iraq and Afghanistan–991
Flight simulation
  carotid baroreflex and sympathetic response in push-pull maneuver–841

effect of pilot's expertise and hippocampal size on performance–850
oculo-vestibular recoupling to mitigate motion sickness–549
Flight surgeons, *Through the Eyes of a Tiger: An Army Flight Surgeon's Vietnam Journal* (Book Review) –533
Flotation clothing, buoyancy of, for travel on ice roads–1077
Flying phobia, sudden onset of–1106
Food, developing food system for exploration spaceflight–712
Forehead-mounted sensor, for in-cockpit early hypoxia detection and warning–1067, E1(Nov)
Framingham risk factors
cardiovascular risk and events in airline pilots–465
in astronauts with myocardial infarction on long-duration missions–79
Functional Task Test battery, assessing neuromuscular function of astronauts after "unweighting"–812
Fungal sinusitis, allergic, with nasal polyps and cavitary lesion–717

G

G forces
+G_z tolerance in simulated push-pull maneuver–841
+G_z-induced neck pain in fighter pilots–1092
participant tolerance in centrifuge-simulated suborbital flight–929
Galvanic vestibular stimulation
impact on arm-hand posture–654
oculo-vestibular recoupling using–549
Gas embolism
cerebral arterial, during hypobaric exposure–1084
pre-dive exercise and post-dive evolution of venous–30
simulation of hematocrit effects on dynamics of arterial–92
venous, body fat and Doppler bubble grades after diving–951
Gastrocnemius muscle, *vs.* soleus muscle response to chronic hypobaric hypoxia–1037
Gender differences
CPR performance in hypogravity and microgravity and–643

Supercomputers, in aerospace medicine–715
Supplemental oxygen, hypoxic hypoxia at moderate altitudes–975
Surveys, of space shuttle flight crew spatial orientation–383
Survival situations, maladaptive behaviors in survivors–1152
Survival time, propranolol in disabled submarines–131
Swelling, idiopathic urticaria in a navigator–72
Syncope
repeated hypoxic, in helicopter pilot at simulated altitude–609
temporal artery flow pattern as early indicator of–394

T

Tail suspension models
ligustrazine and soleus muscle contractile properties–1049
modified technique in rats for longer periods–1176
Target detection, peripheral vision in model for–585
Task-specific resistance, pneumatic muscle actuator use in microgravity–696
Technology--*See also* Science and Technology Watch
calibration check for reduced oxygen breathing device–903
Handbook of Human-Machine Interaction (Book Review)–811
Temporal artery, Doppler flow pattern as early indicator of syncope–394
Temporomandibular joint disorders, gnatho-postural treatment in Air Force pilot–522
Tetramethylpyrazine (Tmp)--*See* Ligustrazine
Thermoprotection, buoyancy of flotation clothing for travel on ice roads–1077
Thermoregulation
with cold water immersion after 35 days horizontal bed rest–472
with lower body water immersion–935
Tissue engineering, with regenerative nanomedicine–1025
Toric phakic intraocular lens, stability in high +G_z–144
Total organic carbon levels, in drinking water on International Space Station–598
Training
altitude effects in adolescent alpine skiers–50
changes in physical fitness in Air Force cadets–35
effect of nontraditional modalities on performance–985
flight hours and performance in commercial aviation–776
hypoxia, symptom replication in experienced military aircrew–962
Simulation in Aviation Training (Book Review) –1101
Transient global anemia, aeromedical implications–565
Transport
aeromedical evacuation staff at high altitude after Yushu earthquake–436
Lassa fever patient using aircraft transit isolator–527
Traumatic brain injury, seizure risk after–140
Travel medicine–*See also* Air travel
professional aircrews' attitudes toward infectious diseases–1167
Tuberculosis, contact tracing in an aircraft cabin crew–61

U

U-2 pilots, hyperintense white matter lesions in–1117
U.S. Air Force
diplopia in a pilot–154
nontraditional training modalities and physical performance in–985
seizure risk in aircrew after traumatic brain injury–140
training changes in physical fitness in Air Force cadets–35
U.S. Army
spatial disorientation in rotary-wing operations–739
survey of flight medics in Iraq and Afghanistan–991
Ultrasound, diagnostic--*See also* Doppler ultrasound
spaceflight and–1009
virtual guidance for spaceflight and remote environments–995
Ultraviolet (UV) light, vitamin D supplementation in environment without–534
Underwater performance, measuring dexterity and anxiety in divers using novel task–54
Unloading models, response to cold water immersion after 35 days of horizontal bed rest–472
Unpressurized aircraft, hypoxic hypoxia at moderate altitudes–975
Unweighting, assessing neuromuscular function of astronauts after–812
Urticaria, idiopathic in a navigator–72
Utricular function, vestibular evoked myogenic potentials and motion sickness–14

V

Vaccines, cholera in deployed settings–814
Vascular pressure distention, and G-induced arm pain in fighter pilots–667
Vasoconstriction
gender differences during lower body negative pressure–118
responses to lower body water immersion–935
Vasovagal syncope, in helicopter pilot at simulated altitude–609
Vehicle submersion, clothing buoyancy and underwater horizontal swim distance–1077
Venous gas emboli
body fat and Doppler bubble grades after diving–951
pre-dive exercise and post-dive evolution of–30
Venous hypertension, in space obstructive syndrome–64
Venous obstruction, in space obstructive syndrome–64
Ventilation, responses to hypobaric and normobaric hypoxia–677
Vertigo

embolic mechanism in inner ear decompression sickness–1097
space shuttle flight crew spatial orientation survey results–383
Vestibular adaptation, effect of flight experience on perceived pitch position–496
Vestibular evoked myogenic potentials
inner ear decompression sickness and–1097
motion sickness susceptibility–14
Vestibular illusions, galvanic vestibular stimulation and arm-hand posture–654
Vestibular-cervical-ocular responses, gaze control after prolonged exposure to microgravity–1117
Vibration
arterial oxygen pressure after whole-body–431
CT of pericardium and lungs in helicopter pilots exposed to–858
enhanced bone recovery after spaceflight and–68
Vibroacoustic disease, in helicopter pilots exposed to vibration and noise–858
Viral hemorrhagic fever, aeromedical evacuation using aircraft transit isolator–527
Viral infections, cholera in deployed settings–814
Virtual guidance, for diagnostic ultrasound for spaceflight and remote environments–995
Visian™ implantable collamer lens, stability in high $+G_z$–144
Visibility, airborne visibility indicator system–1104
Vision
cognitive cues and visually induced motion sickness–477
peripheral, in moving target search and detection model–585
Vision correction
stability of phakic intraocular lens implant in high $+G_z$–144
Vision impairment
diplopia in an Air Force pilot–154
space obstructive syndrome and–64
with hypoxic hypoxia at moderate altitudes–975
Visual disability, effect of lasers' spectral and temporal profile on–1135
Visual tracking, gaze control after prolonged exposure to microgravity–1117
Vitamin D, supplementation in environment without UV light exposure–534

W

Waivers--*See* Aeromedical disposition
Walking, cardiovascular drift and oxygen uptake during–660
Water, dimethylsilanediol levels on International Space Station–598
Water immersion
hemodynamic and thermoregulatory responses to lower body–935
in protective clothing, initial heat stress and response to cold–746
responses to after 35 days horizontal bed rest–472
Weather, CAMI tools and services for evaluating space–916
Weightlessness, gender differences in antipyrine pharmacokinetics in simulated–8
Whole-body vibration
arterial oxygen pressure after–431
CT of pericardium and lungs in helicopter pilots exposed to–858
Women
criteria for heat tolerance in–58
net energy expenditure of in-flight high-speed resistive exercise by–111
Work of breathing, limitations in physically demanding occupations–424

Y

You're the Flight Surgeon–72, 154, 454, 539, 625, 717, 719, 814, 816, 918, 919, 1013, 1015, 1106, 1107, 1192, 1194
Yushu earthquake, aeromedical evacuation staff at high altitude after–436

Z

Zero gravity environment
space adaptation back pain–2
space obstructive syndrome–64
